

# CONSENT WITHDRAWAL FORM

QUT Ethics Approval Number 7414

Centre for Microbiome Research  
Queensland University of Technology  
Faculty of Health  
School of Biomedical Sciences

## Research Team

Prof Gene Tyson	Principal Investigator	Dr Asha Bowen	Associate Investigator
Dr Simon McIlroy	Associate Investigator	Prof Benjamin Howden	Associate Investigator
Dr Ben Woodcroft	Associate Investigator	Dr Elise Pelzer	Associate Investigator
Dr Allison McInnes	Associate Investigator	Dr Emily Hoedt	Associate Investigator
Ms Charlotte Vivian	Biobank Manager	Dr Alexei Chklovski	Associate Investigator
Dr Peter Sternes	Associate Investigator	Ms Melody Dobrinin	PhD Student
Dr James Volmer	Associate Investigator	Ms Camila Pintos	PhD Student
Dr Kaylyn Tousignant	Associate Investigator	Ms Annie Xu	PhD Student
Dr Suzanne McCusker	Associate Investigator	Ms Katherine Barlow	PhD Student
Prof Trent Munro	Associate Investigator	Ms Siobhan Ingram	Research Assistant
Prof Fiona Wood	Associate Investigator	Ms Ana Astorga Alsina	Research Assistant
Prof Gerald Holtmann	Associate Investigator	Ms Madeleine Yule	Research Assistant
Dr Páraic Ó Cuív	Associate Investigator	Ms Vidya Gummagatta	Research Assistant
Dr Nicola Angel	Associate Investigator	Dr Pam Engelberts	Postdoctoral Fellow

## Statement of Consent

### By signing below, you are indicating that you:

- I wish to withdraw from participation in the above research project and understand that such withdrawal will not affect my routine treatment, my relationship with those treating me or my relationship with the Centre for Microbiome Research or Queensland University of Technology.
- I wish to withdraw my consent as described below:
  - No further contact** – I request no further contact in relation to this research but permit the continued use of previously obtained samples and information.
  - No further use** – In addition to no further contact from the research team, I wish to withdraw the use of previously collected information and samples. In this case, I have been informed that microorganisms collected from their samples (and associated data) may already have been entered into the biobank and used by researchers outside of the original study team.
